ABEGAIL FONTANILLA

Mathematics | Data Analytics | AI Workflows & Automation
(+63) 9278850333 • abbeyfontanilla@gmail.com • abegailf.vercel.app • Santa Rosa, Laguna 4026, PH

Summary

Analytical specialist with a strong foundation in Mathematics, dedicated to streamlining operations through data analytics, AI workflows, and practical automation. Experienced in identifying operational bottlenecks and deploying AI-assisted tools, agentic workspaces, and custom scripts to eliminate repetitive tasks and accelerate business workflows. Combines mathematical rigor and hands-on LLM orchestration (OpenAI, Gemini, Claude) to transform complex data and manual processes into efficient, automated solutions.

Technical Tools

AI & Agentic Tools: Antigravity, Claude Code, Google AI Studio, AI Agent Workflows, LLM Prompting
LLMs & GenAI: OpenAI (ChatGPT / API), Google Gemini, Anthropic Claude
Analytics & BI: MS Excel (Advanced, VBA), Google Sheets, Tableau, SQL, Google Analytics 4
Productivity & Developer Platforms: Visual Studio Code, GitHub, ClickUp, Meta / IG Ad Manager

Experience

Mathspace Sydney, AU (Remote)
Mathematics Digital Content Writer *Apr 2025 - Present*

- Designed and orchestrated an agent-driven authoring workspace powered by 12 specialized Antigravity AI skills, automating curriculum scoping, template authoring, psychometric QA audits, and XML revisions across Australian and US curricula.
- Reduced a 4-hour manual data collation task to under 10 minutes by implementing a custom Python automation script.
- Conducted R&D for a Python-based tool to automatically evaluate worksheet answers, testing and benchmarking different LLMs (OpenAI, Gemini) to analyze grading accuracy.
- Implemented automated preflight checks and browser scripts to catch template syntax errors and automate batch uploads to the Mathspace platform.

Gingersnaps Pasig, PH (Onsite)
Category Analyst *Jan 2025 - Feb 2025*

- In a high-impact, one-month project, developed and implemented several data solutions for e-commerce analytics using Excel and VBA.
- Automated the store pullout process with a custom VBA solution, reducing a half-day manual task to under 10 minutes.
- Developed an automated inventory replenishment template in Excel that reduced a 2-hour task to just 10 minutes.
- Designed and built dynamic sales dashboards and inventory forecasting models to help improve their stock management.

Mathspace Sydney, AU (Remote)
Mathematics Digital Content Writer *Mar 2018 - Oct 2024*

- Developed and optimized over 4,000 dynamic and interactive problem templates using Mathspace's proprietary scripting language, Mathyon-S, implementing quality checks to ensure mathematical accuracy and consistency.
- Co-authored and developed digital mathematics curricula, lessons, and interactive worksheets published across multiple official Mathspace print and digital textbooks.
- Recognized as a ClickUp Power User for streamlining editorial workflows and team collaboration.

Security Bank Alabang, PH (Onsite)
Customer Advisor *Jun 2013 - Jan 2018*

- Conducted financial data analysis in Excel to help clients with their investment planning and cash flow projections.
- Consistently achieved 100% of my sales quota through data-informed advice and by building strong client relationships.

Education

Philippine Normal University - Bachelor of Science in Mathematics for Teachers

Skills

AI Workflow Orchestration • Process & Workflow Automation • LLM Evaluation & Benchmarking • Data Analysis & Modeling • Quality Assurance (QA) Auditing • Analytical Problem-Solving • Operational Efficiency • Cross-Functional Collaboration

Certification

Google Data Analytics *Jun 2024*
